## Further information

Norfolk County Council is modernising its network of recycling centres.

We plan to build bigger best practice recycling centres which offer a wider range of recycling services. This includes the recycling centre recently opened in Kings Lynn.

This will offer better access to recycling facilities for more of Norfolk's population in the long term.

We appreciate that these changes will have an impact on local residents but we have tried hard to find solutions which have the least impact on the County's residents.

This is why we have moved to opening some sites only on the days when they are most busy.

### We're happy to help

All site staff are fully trained as Recycling Advisors. If you require any assistance during your visit please do not hesitate to ask.
